

Amalathas Dilshan

AIML Engineer Intern

+94 768720035 | amalathasdilshan@gmail.com | [LinkedIn](#) | [GitHub](#) |

PROFILE SUMMARY

Motivated and detail-oriented Information Technology undergraduate specializing in Data Science, with a strong interest in Artificial Intelligence and Machine Learning. Possessing a solid foundation in programming, data analysis, and problem-solving, with knowledge of Python, machine learning concepts, and data-driven technologies. Passionate about applying analytical and technical skills to develop intelligent solutions and eager to gain practical experience as an AI/ML Engineer Intern while contributing to innovative projects and expanding expertise in emerging technologies.

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript, C
- **AI/ML & Data Science:** Machine Learning, Data Analysis, Data Preprocessing, Model Development, Data Visualization
- **Web Technologies:** MERN Stack (MongoDB, Express.js, React.js, Node.js), Django, Next.js, Flutter
- **Databases:** MongoDB, MySQL, Microsoft SQL Server (MS SQL)
- **Development Methodologies:** Agile/Scrum, SDLC
- **Tools & Others:** Git, Jupyter Notebook, Postman, Debugging

PROJECTS

- **AI-Based Student Hostel Management System** **2026**
 - Developed an intelligent hostel management system to efficiently manage room listings, student accommodations, and booking processes.
 - Implemented AI-based features including smart room recommendations and data-driven insights to enhance decision-making and improve user experience.
 - Designed and developed both frontend and backend components using React and Django with full integration of SQL Server database.
 - Developed a mobile application version using the MERN stack to provide students with accessible hostel booking and management features.
 - Performed API testing and validation using Postman to ensure reliable backend functionality, data accuracy, and seamless communication between system components.
 - **Technologies:** Python (Django), React, MongoDB, Express.js, Node.js, SQL Server, Artificial Intelligence, Postman
- **Stock Management System** **2025**
 - Designed and developed a comprehensive Stock Management System to efficiently manage inventory, product records, and stock transactions.
 - Applied database design principles and software engineering best practices to ensure system reliability and maintainability.
 - Integrated MS SQL Server for secure database management, enabling real-time stock tracking, inventory updates, and reporting operations.
 - **Technologies:** Java, MS SQL Server, Software Engineering
- **Sales Forecasting Model (AI/ML Research Project)** **2025**
 - Developed an advanced Sales Forecasting Model using machine learning techniques to predict future sales trends and patterns.
 - Conducted comprehensive data preprocessing, feature engineering, and model training using multiple algorithms to improve prediction accuracy.
 - Analyzed forecasting results and generated data-driven insights to support business decision-making and sales planning strategies.
 - **Technologies:** Python, Machine Learning, Data Analysis

CERTIFICATIONS

AI Expo - participation certificate – SLIIT Northern UNI

2025

EDUCATION

- SLIIT (Reading)

July 2024 – Present

B.Sc. in Information Technology (Specialization in Data Science)

Focus on Artificial Intelligence, Machine Learning, Data Analytics, software development, and data-driven technologies

Secondary Education

2022

J/ Nelliady Central College, Jaffna, Sri Lanka

Advanced Level – Mathematics (Physical Stream)

LANGUAGES

- English (Advanced)
- Tamil (Native)

INTERESTS

Machine Learning		Deep Learning		AI Integration		Web Technologies
Software Development		Problem Solving		Data Analytics		Emerging Technologies
